XI. ECPP Congress, Portorož 2014, Slovenia

Modern psychoanalytic psychotherapies in modern times?

www.ezpps.org

XI. Congress of the European confederation of psychoanalytic psychotherapies (ECP) is a wonderful opportunity for all who wish to share their enthusiasm over new knowledge in psychotherapy and who wish to meet psychotherapeutic colleagues from all over Europe.

XI. Congress will take place between 19.-20. September 2014

After little over 10 years, the ECPP congress is again to take place in Slovenia, as it was with the first, in the year 2003. The chosen congress location in itself will contribute to the attraction of the event: a coastal city at the edge of the Adriatic Sea with more than a century old touristic tradition.

Portorož and Grand Hotel Metropol*****

The hotel is located on a small hill, directly above the sea, with a view covering the entire bay of Piran, the marina, the Salt-pans and hilly Istria beyond the Croatian coast. On a clear day it can reach all the way to the Venetian lagoons in the west and revealing the Alps and the Dolomites mountain range in the north. The very sight of Grand Hotel Metropol, which, at sunrise and sunset is clad in a glittering gold colour, is breath-taking.

Why attend the congress?

Personal connections are extremely important and the congress will be an excellent opportunity for taking part in debates with colleagues, developing new ideas and becoming acquainted with perspectives of other psychotherapists, whose experiencing and practicing may be very different from your own. This of course is always exciting and inspiring.

It is our hope that the congress will succeed in addressing a multitude of perspectives: those facing outwards, towards society and the cultural environment, and those facing inwards, towards the mind and soul experienced in therapeutic encounters. As psychotherapists we have an important mission, to focus on the circumstances and causes of suffering of our fellow-man and to assist him in alleviating his own suffering.

Baring this in mind, the programme committee has chosen, as the main theme of the congress, the following subject: **"Modern psychoanalytic psychotherapies in modern times?"**

This subject will be addressed by way of the following sub-headings:

1.) Modern technologies and psychoanalytic psychotherapies

2.) Different techniques in psychoanalytic psychotherapies
